Chapter 1 Introduction

What is the EasyDB Login plugin?

The Sitelok EasyDB Login plugin allows a single sign-on (SSO) between Sitelok and EasyDB for members belonging to specific usergroups. This saves users having to login to Sitelok and to EasyDB separately.

Chapter 2 Installation

Installing for the first time or upgrading

- 1) Extract the contents of the zip file to your PC.
- 2) Upload the plugin_easydb folder to your existing Sitelok slpw folder using FTP. There are no special permissions required on most servers.
- 3) Login to the Sitelok control panel.
- 4) Open the following URL in the browser

http://www.yoursite.com/slpw/plugin_easydb/install.php

which will start the installation process. If all is well you will be taken to the plugin preferences page where you will see the plugin listed.

If you have any problems with installation please let us know so that we can help you.

Setting up the plugin

You can access the plugin configuration by selecting **EasyDB Login** from the **Plugins** menu.

Here you can define which usergroups should be logged in automatically to EasyDB. By default members of ADMIN have access but you can set any usergroups required.

Disabling the Plugin

To disable the Vanilla plugin select **Plugin Preferences** in the **Plugin** menu option of Sitelok. Uncheck the enable box for the plugin and click the **Save** button.

You can enable it again in the same way.

Uninstalling the plugin

To permanently remove the plugin and its settings follow these steps.

- 1) Disable the plugin as above.
- 2) Click the delete icon next the plugin in the disabled plugins section.
- 3) Confirm the action in the alert box.

If the plugin is uninstalled successfully you will be returned to the plugin preferences page.

Chapter 3 Support

Hopefully if you have followed this manual carefully everything will be working fine. However sometimes things don't go quite so smoothly so if you have any questions or problems then please check the FAQ on the support page or email us.
