Chapter 1 Introduction

What is the Sitelok Password Sentry plugin?

Password Sentry is a third party product that analyzes user logins to detect and suspend users that are sharing passwords. This plugin allows integration of the Password Sentry system with Sitelok so that login is blocked if a user account is suspect.

For more information about Password Sentry please visit the developers site at <http://www.password-sentry.com>.

Chapter 2 Installation

Installing for the first time or upgrading

- 1) Extract the contents of the zip file to your PC.
- 2) Upload the plugin_passwordsentry folder to your existing Sitelok slpw folder using FTP. There are no special permissions required on most servers.
- 3) Login to the Sitelok control panel.
- 4) Open the following URL in the browser

http://www.yoursite.com/slpw/plugin_passwordsentry/install.php

which will start the installation process. If all is well you will be taken to the plugin preferences page where you will see the plugin listed.

If you have any problems with installation please let us know so that we can help you.

Configuration

In the Sitelok admin click **Password Sentry** in the **Plugins** menu to display the plugin page.

Password Sentry plugin

Settings

Password Sentry URL
This should be similar to http://www.yoursite.com/hed67r2det23uy3/sentry.php?setupname=setup1

Block ADMIN users? ⌵
To stop ADMIN users getting locked out it is recommended to set 'Never block ADMIN users'

Password Sentry URL

Set this to the URL provided by Password Sentry for checking users. This will usually be a URL such as

<http://www.yoursite.com/hed67r2det23uy3/sentry.php?setupname=setup1>

where setup1 at the end is the setup name you are using.

Block ADMIN users?

Normally you should leave this setting as **Never Block Admin Users**. If you set this to **Handle ADMIN as other users** then there is of course a risk you may ave your own account suspended!

Click **Save** to store the settings.

In use

At login Password Sentry will check the user and if is suspected of password sharing will be blocked access. By default Sitelok will display the message

Your account has been suspended

above the login form when this happens. YOu can change this message in `plugin_passwordsentry/config.php` in the line

```
define("MSG_PS_ACCESSDENIED","Your account has been suspended");
```

if required.

Disabling the Plugin

To disable the Amazon SES plugin select **Plugin Preferences** in the **Plugin** menu option of Sitelok. Uncheck the enable box for the plugin and click the **Save** button. You can enable it again in the same way.

Uninstalling the plugin

To permanently remove the plugin and its settings follow these steps.

- 1) Disable the plugin as above.
- 2) Click the delete icon next the plugin in the disabled plugins section.
- 3) Confirm the action in the alert box.

If the plugin is uninstalled successfully you will be returned to the plugin preferences page.

Chapter 3 Support

Hopefully if you have followed this manual carefully everything will be working fine. However sometimes things don't go quite so smoothly so if you have any questions or problems then please check the FAQ on the support page or email us.
