Chapter 1 Introduction

What is the SiteLok Stats plugin?

This plugin collects a range of usage stats, such as new users and logins, and displays them using graphs and widgets. Historical data for many stats are created when the plugin is first installed although some stats will only start to be collected after the installation.

Please note that if you disable the plugin then the collection of stats will stop until you enable the plugin again. If you uninstall the plugin then collect stats will be deleted.

Chapter 2 Installation

Installing for the first time or upgrading

- 1) Extract the contents of the zip file to your PC.
- 2) Upload the plugin_stats folder to your existing Sitelok slpw folder using FTP. There are no special permissions required on most servers.
- 3) Login to the Sitelok control panel.
- 4) Open the following URL in the browser

http://www.yoursite.com/slpw/plugin_stats/install.php

which will start the installation process. This may take a while if you have a large number of users or log entries. If all is well you will be taken to the plugin preferences page where you will see the plugin listed.

If you have any problems with installation please let us know so that we can help you.

Disabling the Plugin

To disable the Stats plugin select **Plugin Preferences** in the **Plugin** menu option of Sitelok. Uncheck the enable box for the plugin and click the **Save** button. You can enable it again in the same way.

Uninstalling the plugin

To permanently remove the plugin and its settings follow these steps.

- 1) Disable the plugin as above.
- 2) Click the delete icon next the plugin in the disabled plugins section.
- 3) Confirm the action in the alert box.

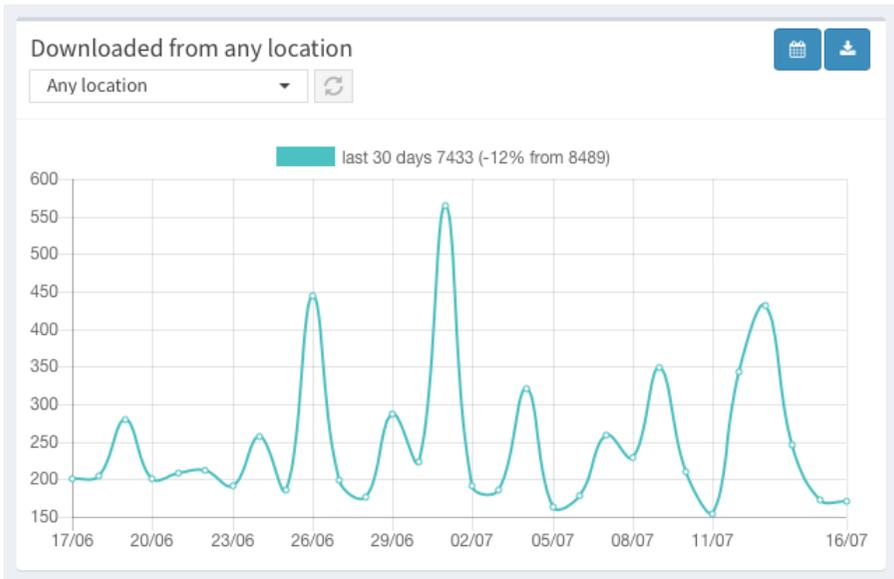

If the plugin is uninstalled successfully you will be returned to the plugin preferences page.

Chapter 3 Stats

Graphs

The main plugin page (**Plugins - Stats**) displays graphs for the various stats.

Here is an example graph showing the number of downloads over a 30 day period.

Please note that the graphs update dynamically but may take 60 seconds or so to show changes.

Click the date range icon  to change the graph date range.

Click the export icon  to download the values from the graph in a comma delimited (.csv) file which can be open in most spreadsheet apps.

Some graphs have another setting to enable usergroup or product id selection. Select as needed and click the update  icon to update the graph.

Chapter 3 - Stats

Some graphs show the total for the date range of the graph and also a comparison total for the previous period (the same number of days immediately before the graph range). So for our example download graph above

 last 30 days 7433 (-12% from 8489)

we can see there were 7433 downloads for the 30 days shown on the graph and 8489 downloads during the previous 30 days (down 12%).

To change which graphs are displayed go to the settings page by clicking the Settings button at the bottom of the Stats plugin page (**Plugins - Stats**).

Graph settings

Select/deselect all

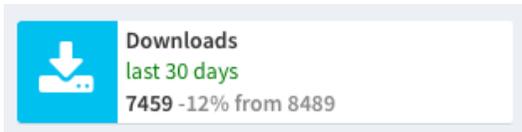

<input checked="" type="checkbox"/> New users	<input checked="" type="checkbox"/> Total users	<input checked="" type="checkbox"/> Joined usergroup
<input checked="" type="checkbox"/> Top joined usergroups	<input checked="" type="checkbox"/> Renewed usergroup	<input checked="" type="checkbox"/> Top renewed usergroups
<input checked="" type="checkbox"/> Purchased	<input checked="" type="checkbox"/> Top purchases	<input checked="" type="checkbox"/> Linklok purchases
<input checked="" type="checkbox"/> Linklok top purchases	<input checked="" type="checkbox"/> Downloads	<input checked="" type="checkbox"/> Top downloads
<input checked="" type="checkbox"/> Logins	<input checked="" type="checkbox"/> Failed logins	

Check the box for the graphs you wish to display. You can uncheck unneeded graphs as stats will still be collected anyway.

Widgets

Widgets are small info boxes on the dashboard showing various stats.

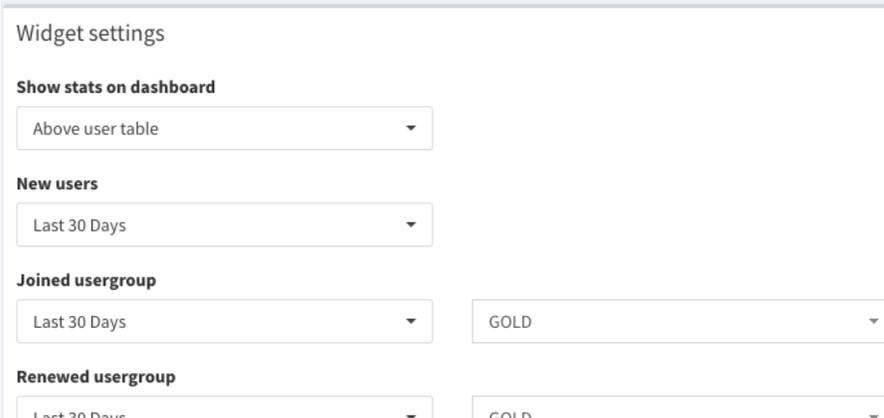

Here is an example widget showing the number of downloads over a 30 day period. We can see there were 7433 downloads for the 30 days shown on the graph and 8489 downloads during the previous 30 days (down 12%).

Please note that the widgets update dynamically but may take 60 seconds or so to show changes.

To see a related graph click the graph icon  which appears when you hover over the widget.

To setup the widgets click the settings icon  which appears when you hover over the widget. Alternatively go to the settings page by clicking the Settings button at the bottom of the Stats plugin page ([Plugins - Stats](#)).

Widget settings

Show stats on dashboard

Above user table

New users

Last 30 Days

Joined usergroup

Last 30 Days | GOLD

Renewed usergroup

Last 30 Days | GOLD

You can setup the date range for the widget (and any usergroup or product setting) and also whether the widgets should appear above or below the main user table on the dashboard.

New users

This graph shows the number of new accounts created each day.

When the stats plugin is first installed historical data will be created.

Total users

Shows the total number of users in the database on each day.

When the stats plugin is first installed historical data will be created.

Joined usergroup

This graph shows the number of users who joined a selected usergroup (or any usergroup) each day. Enter/select a usergroup or 'Any usergroup' on the graph and click the update icon .

Data for this stat will begin when the stats plugin is installed. Historical data can't be created.

Top joined usergroups

Shows the top (maximum 10) usergroups users joined for the date range of the graph.

Data for this stat will begin when the stats plugin is installed. Historical data can't be created.

Renewed usergroups

This graph shows the number of users who renewed access to a selected usergroup (or any usergroup) each day. A user is considered to have renewed if the expiry date on their usergroup access is changed to today or later. Enter/select a usergroup or 'Any usergroup' on the graph and click the update icon .

Data for this stat will begin when the stats plugin is installed. Historical data can't be created.

Top renewed usergroups

Shows the top usergroups (maximum 10) users renewed for the date range of the graph.

Data for this stat will begin when the stats plugin is installed. Historical data can't be created.

Purchased

This graph requires a payment plugin to be installed.

The graph shows the number of purchases of the selected product each day for the date range of the graph. Enter/select a product or 'Any product' on the graph and click the update icon .

Data for this stat will begin when the stats plugin is installed. Historical data can't be created.

Top purchases

Shows the top products purchased (maximum 10) by users for the date range of the graph.

Data for this stat will begin when the stats plugin is installed. Historical data can't be created.

Downloaded from location

This graph shows the number of downloads each day from the selected download location (or all locations). Select the download location or 'Any location' on the graph and click the update icon .

When the stats plugin is first installed historical data will be created if you have logging of downloads enabled (it is by default).

Top downloads

This stat requires logging of downloads to be enabled (it is by default).

Shows the top files downloaded (maximum 10) by users.

When the stats plugin is first installed historical data will be created if you have logging of downloads enabled (it is by default).

Logins

Shows the total successful logins for each day.

When the stats plugin is first installed historical data will be created if you have logging of logins enabled (it is by default).

Failed logins

Shows the total failed login attempts for each day.

Chapter 4 Support

Hopefully if you have followed this manual carefully everything will be working fine. However sometimes things don't go quite so smoothly so if you have any questions or problems then please check the FAQ on the support page or email us.
